CIA  
COMOR

## MC&G Requirements for

25X1

1. The Working Group undertook completion of the review of the draft on the above subject circulated on 2 June. Review of this document was completed. Principal items included refinements statements, timeliness of collection, the matter of omitting nominative solutions, expressions of capabilities of MC&G collection compatible with search/surveillance, and degree of detail to be included in the requirements paper. In addition to these matters, the following points were made:

25X1A

25X1A

a. With respect to concern about design criteria for the guidance of the NRO, it was concluded that this would not be necessary for inclusion in the paper to go to USIB. The Chairman expressed that he felt such matters were the responsibility of the NRO and determination of these technical data would normally be accomplished with the input of technical production personnel.

NRO review(s) completed.

Copy 24 of 25

It was not anticipated that this traffic would all funnel through the COMOR MC&G Working Group, but that progress, effectiveness toward meeting objectives and problem areas would be discussed in the Working Group. This policy would be refined by experience.

b. The Chairman indicated that his office would complete the paper on the above subject, and forward it simultaneously to the Working Group and the COMOR members. He stated that his present plans called for sending the subject paper to USIB without inclusion of other requirement matters now being addressed for [redacted] but this intention might be altered in COMOR review.
